Issue No. 2/2018

Our Vision

We aspire to be the Vibrant Learning Campus where pupils learn, lead, serve and grow to become future-ready citizens rooted in values.

HIGHLIGHTS & KEY EVENTS OF TERM 1 & 2

P6 Festive Outreach

In the spirit of celebrating Chinese New Year, the school took the opportunity to encourage our students to become active members of the community by engaging them in spreading the festive cheer. Our Primary 6 students, together with the School Leaders and their teachers, presented mandarin oranges to members of the community. Through the activity, the school hopes to enhance our students' sense of belonging to the community, deepen their social awareness and also to help them to develop better interpersonal communication skills. For many of our students, this was their first time reaching out to the residents of the community.

"I was nervous as I was the first one to enter the store. But I did well after a few rounds. The store owners were happy. I felt satisfied at the end of the day as we have made their day special." --- Charles, 6A

- Highlights & Key Activities of Term 1 & 2
- Overseas Visitors
- Achievements

Chinese New Year Celebrations

It was a joyous occasion for Temasekians as the school celebrated Chinese New Year on 15 February 2018..We would like to thank the teachers in the Chinese Language department for decorating the school and for the well-received concert.

Temasek Community Garden

The Temasek Community Garden has been completed at the start of 2018. It is an outdoor laboratory with a diverse variety of plants and animals. It is created to allow students to observe and learn about nature in a landscape garden environment. There are about 55 different species of plants in the garden. The garden serves to inspire pupils to cultivate a respect for nature through an appreciation of plants in their various stages of growth. The community garden is divided into four different themes: Herb Garden, Fruit Paradise, Vegetable Farm and Flower Towers. It showcases an assortment of plants, from flowers such as hibiscus and morning glory to vegetables such as cucumbers, capsicum, onions and fruits such as papayas, bananas, golden apples etc. Take a walk around and one can discover more about the plants that one seldom sees.

The community garden is jointly maintained by students from Club Eureka, teachers, Parent Connection Committee members and Parent Volunteers. It is a place where teachers, students and parents can mingle and interact. The edible harvests will be shared among the community and donated to the Lions Home for the Elders, to instill a sense of duty, empathy and foster community spirit in the students. The community garden also serves as a learning hub for gardening knowledge and skills, and also as an outdoor education where students have the opportunity to germinate and harvest herbs and fruits. It also promotes experiential learning and serves to motivate students in the learning and reinforcement of school values. From the caring of the plants, the students develop a sense of responsibility and purposefulness.

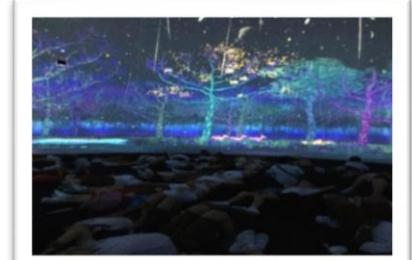

Heritage Learning Journey

Primary 4

Our P4 students went on a Heritage Learning Journey to be exposed to and appreciate the art works of our very own local artists. The places they visited for this learning journey were the Wall Murals at Waterloo Street, Graffiti Wall at Queen Street and the National Museum of Singapore. Through this learning journey, students learnt about Singapore's historical past. They were able to appreciate the cultural diversity in Singapore through the paintings, installation and digital art works that were displayed.

"It was an enriching and wonderful learning journey for the Primary 4 students. At Queen Street, they learnt about Singapore's rich cultural history and stories behind the artistic graffiti wall. A parent volunteer even shared her opinion and said, "Why travel overseas to view art? We have such beautiful art works right here in Singapore!" At the National Museum of Singapore, my students marvelled at the beauty of a forest environment brought to life through digital technology. I personally feel that I have gained deeper appreciation of the arts through this learning journey." - Mr Ernest Choon, Form teacher of P4C

Primary 5

This year, the National Education (NE) Committee organised a Heritage Learning Journey to Little India for our P5 students. Through this learning journey, students learnt to understand the origins of the different types of Indians, reasons for their migration to Southeast Asia, the jobs that they take on and the different religions, traditions and practices of the Indian community. The students enjoyed the activities. They even had the opportunity to sample thosai and watch our very own teacher, Mrs Sharma, demonstrate how to wear a sari!

Primary 6

On 29 January and 1 February, the P6 students went on a NE Heritage Learning Journey to Chinatown. Through the learning journey the students were able to appreciate the cultural diversity of the different ethnic communities, understand the importance of groups and individuals in the community, learn about barter trade and how human activities affect the development of a community. Students also learnt more about the Chinese culture, cuisine and religion, as well as the legacy left behind by the Chinese settlers in Singapore.

Before I went to Chinatown, I did not know that the Thian Hock Keng temple was actually so huge and that there were different deities in the temple. I learnt that all the deities in the temple have different roles. I was also fascinated to learn that the early immigrants who arrived from China to Singapore faced a lot of difficulties. Almost 10000 of them had to squeeze into one boat and the journey lasted for about 2 to 3 weeks. I was told that the Samsui women, who came to Singapore to work were as young as 10 years old! I was shocked that such young girls travelled so far to work just to earn money. I will definitely visit Chinatown again with my parents and be their tour guide! ~ Cheryl and Wenxi (P6C)

Total Defence Day

TOTAL DEFENCE 2018 TOGETHER WE KEEP SINGAPORE STRONG

Total Defence is the cornerstone that makes Singapore what it is today. It is vital in ensuring the security, survival and success of the country. To commemorate Total Defence Day, the school's National Education (NE) committee organised a myriad of activities and programmes such as family activities for the different levels, a video presentation of the Total Defence message, an assembly talk about Emergency Preparedness as well as activities during recess where students were able to experience the kinds of food eaten during wartime, such as porridge, sweet potatoes and tapioca. Through this experience, our students were better able to understand what their forefathers went through during war and be appreciative of the peace and harmony that Singapore has today.

Netball Sports School Carnival

On 24 February 2018, our Netball junior and senior school team members, accompanied by Mdm Farhati and Ms Jill Wong, participated in the Netball Carnival held at the Singapore Sports School. It is an annual event held before the Zonal Competition for new players to gain exposure to the game and the rules. For many of the junior girls in the P4 and P5 levels, it was a good opportunity for them to apply what they have learnt during training and experience playing an actual game without the stress of winning. For many of them it was also their first time playing in a real game on the court. It was heartening to know that all of them had a meaningful and fulfilling time at the carnival.

Prefect Investiture 2018

On 2 March 2018, the annual Prefect Investiture was held in conjunction with the school's Leaders' Day. The event was witnessed by P3 to P6 students, teachers and school leaders. The Prefect Investiture is a solemn event where the staff and students get to witness the appointment of our P5 and P6 Senior Prefects to serve in the Council. These prefects represent the student body and uphold the image of the school. They also guide the Junior Prefects in serving the school and ensure that leadership succession is in place. Our Principal, Mrs Ho, addressed the school and specifically, the student leaders of the Prefect Council, on the importance of taking on leadership roles and the desired attributes of an effective student leader before presenting the appointment letters to the executive committee leaders.

The newly elected Head Prefect, Shernice Ng of 6A and the 4 Deputy Head Prefects, Ryan Johan of 6A, Kaylene Chan of 6A, Ryka Danani of 6B and Eugene Cheong of 6B were also introduced to the school during the ceremony. These P6 senior prefects had contested in the inaugural Temasek Head Prefect Election 2018 which saw them campaigning graciously from 7 to 9 February during the morning assemblies. Voting was conducted online and offline for students and staff immediately after their last campaign speeches till 11 February 2018. The entire election ended with a panel interview led by the school leaders and the Student Development Team. The elected Head Prefect, Shernice Ng, then led the prefects in the prefects' pledge and students were encouraged to give their support by cooperating with the student leaders to make the school a great place to learn and play.

2018 marks the seventh year that Temasek Primary has organised the Dads for Life programmes. This year, an Airfix Airplane Modelling Workshop was conducted on 9 March for fathers and their children to bond over the activity. It was conceptualised and facilitated by the Family Matters@School Coordinator, Mrs Marilyn Kang. Mr Mark Ortega, Chairman of the Parent Connection Committee, and a member of the School Advisory Committee gave the opening address to an enthusiastic class of fathers and their children. With instructions given by Mr Christopher Brown, an airplane modeller hobbyist, the Dad and child pair started on fixing their airplanes enthusiastically. Mr Soh Yew Hin, father of Soh Shin Chuen of 5B, made three attempts to assemble the landing gear for their airplane. The fathers and their children were all smiles when they posed for photographs to mark the memorable event. All the completed airplanes will be submitted for the National Airfix Aeronautical Engineering Competition 2018 in conjunction with the celebrations for the RSAF 50th anniversary.

It wasn't easy, especially for those of us suffering from 老华眼 or presbyopia in English. The parts were all so small! ~ Mark Ortega, father of Benjamin Ortega (4F)

Temasek Parents' Symposium 2018

With the planning by the Partners' Team, the Parent Connection Committee and the synergy displayed by the various departments, this year's Temasek Parents Symposium was a great success. It was the first time we welcomed more than 270 participants attending 24 workshops. The Ministry of Social and Family (MSF) workshop 'The Secret to Effective Parenting' had a whopping total of 68 parents. The parents provided positive feedback and it was amazing to see all the teachers and parents working and learning together in our Learning Campus.

Earth Hour — Lights Off @Temasek

Earth Hour is a worldwide movement for the planet organised by the World Wide Fund for Nature. The event is held worldwide annually to encourage individuals and communities to turn off their non-essential lights for one hour. We at Temasek Primary also joined in to show our support for Earth Hour 2018 by switching off all the lights for half an hour from 1.00 p.m. to 1.30 p.m. During assemblies, Conservation International engaged the students with an interesting presentation on the Whale Shark and how man's action can have an impact on its habitat. During recess, students also participated in various activities that aim to create an awareness on climate change and the need to protect our Earth.

Primary 5 Camp (Young Explorer Outdoor Education)

The P5 students went for a 3 Days 2 Nights camp from 5 March to 7 March 2018 at Camp Challenge (Sentosa) as part of their Temasek Young Explorer Outdoor Education curriculum. It was the first outdoor adventure camp for many of the students and they looked forward to it. It was indeed a memorable experience as they were exposed to various challenges such as orienteering around Sentosa Island with a map, compass and pace counter. The students and teachers were tired after trekking for 2 to 3 hours but the feeling of accomplishment made it all worthwhile. The students were also engaged in outdoor cooking and had a taste of honey popcorn and toast bread. To round up the camp experience, they participated in team bonding games by the beach, low element and mega catapult challenge. The highlight of the camp had to be the campfire where students and camp coaches put up performances to the delight of the audience. It was certainly a memorable and enriching camp for our students.

Primary 4 Young Explorer (exploring Bedok South Neighbourhood)

On 5 March 2018, the P4 students had the opportunity to apply the navigational skills that they had been taught during their PE lessons. Working in groups, they had to locate six different checkpoints based on the map provided and complete a task at each checkpoint. While the students went about their tasks, they also had to apply good neighbourhood exploration habits such as showing consideration for the residents staying nearby by being mindful of their noise level. They also learnt to care for the environment by picking up litter that they saw along the way. and be concerned citizens as they learnt about the important people (eg. MPs) who are looking after the constituency where the school is located.

It was indeed heartening to observe the excited and smiling faces of all participants as they explored the great outdoors. The PE Department wishes to thank all students, support staff and teachers involved for being fully engaged throughout the session and in ensuring that the event was a success. ~ Mr Fadly

Primary 6 Sports Fiesta

On 5 March 2018, the Primary 6 students had their Learning for Life Programme (LLP) interclass games: Ultimate Championships. The games were held at the school field and each game lasted for 4 minutes each. The Frisbee game saw the students putting to use all the skills and knowledge they had learnt during their PE lessons. Our students also displayed sportsmanship by shaking hands with the opponents after the games. As the saying goes, 'Good players inspire themselves. Great Players inspire others'.

Class	Total no. of points	Position
6A	40	2nd
6B	35	3rd
6C	42	1st
6D	34	5th
6E	35	4th
6F	18	6th

The final results are as shown in the table above.

Temasek Resilience Run 2018

As part of the Sports Opportunities for Active lifestyle and physical Resilience (SOAR) programme, the Temasek Resilience Run was held at Bedok Reservoir Park on Friday, 23 March 2018 for the P4 to P6 students. The event served as a platform to promote healthy and active living, as well as the value of resilience amongst our students. More importantly, the class picnics and games sessions also strengthened student-teacher and student-student relationships.

English Festival 2018

This year our school celebrated the English Festival from 27 March to 29 March 2018. What made this year's celebration more special was the segment where our P1 and P2 students and teachers came to school dressed as their favourite book characters. The three days of fun-filled activities enabled our students to showcase their talents and speak good English. Both students and teachers were entertained by recess performances such as skits, Reader's Theatre, storytelling and poetry recitals. The response was so overwhelming that the performances continued till the following week! During recess, many of our enthusiastic pupils participated in English language related games such as, "Unscramble the Words", "Tongue Twisters" and "Guess the Idioms". Classroom activities such as "Words to Story" provided another platform for pupils to express their creativity.

We would like to thank the teachers and parent volunteers who had helped to make this year's English Festival a successful one.

Delegates learning about Temasek Primary's STEM Education

On 2 February 2018, two esteemed principals from Taiwan, Mr Fan Yang-Hsun and Mr Yu Chih-Hung, from Dong Xing and Shakeng Elementary School respectively, visited our school. They were interested to learn about our school's STEM education, especially our applied learning programme and how we have incorporated it into our curriculum. They observed one of our Primary 4 classes where Mr Lim Wu Yi conducted a STEM lesson integrating our Life Science Programme lesson which enabled the students to use the concept of proportion to solve the problem given to them. Mr Lim planned key questions to ask during the various stages of the lesson. The scenario was designed for the students to transfer key concepts and apply the knowledge they have learnt to a real world situation. Microbits were used to engage the students in their learning for them to be attentive, motivated and actively involved in the learning process. It encouraged ownership of their own learning when they related it to their personal experiences.

Students were also given the flexibility to experiment with different parameters in the coding to achieve the objective. This enabled them to explore and provide different solutions to the scenario with their team members, hence enhancing collaborative and thinking skills. This process enabled the students to be involved in decision making, to make intellectual risks, and to view mistakes as learning opportunities. The students also provided evidence of their learning where they wrote their findings for the teacher to provide feedback.

The principals also visited the Innovation Lab to observe a P1 PAL Robotics lesson, facilitated by Ms Poonam and Miss Jocelyn Goh. Our school leaders and teachers had a meaningful discussion with the Taiwanese visitors where we exchanged pointers on STEM education. Through the discussion, the principals were keen to adopt some of these ideas to kick start the STEM education in their own schools.

Taiwanese Immersion Programme

A group of students and staff from Taipei Jian Kang Elementary School visited the school on a three-day immersion programme from 29 January 2018 to 31 January 2018. During their visit, our P5 students were assigned as buddies to the Taiwanese students to help them ease into our school as they joined them in their learning. Apart from the classroom lessons, our Taiwanese visitors were also engaged in interesting lessons in Robotics, Augmented Reality and the Arts.

Throughout their three-day visit, our P5 buddies played good hosts to the Taiwanese students. On the last day of the immersion programme, the buddies put up the CEIMO dance, which is unique to Singapore, for our visitors. They also exchanged gifts with one other to mark their newly established friendship.

My experience with the Taiwanese pupil was a fantastic one. We were shy at first but as the hours went by, we grew closer. On the second day, I discovered her talent in drawing. She even taught me how to do a new Math question. ~ Deborah, 5D

It was a wonderful opportunity to buddy the Taiwanese pupils. They were friendly and very curious about Temasek and Singapore. I was happy to be a buddy and do my part to show them around our school. ~ Kushaan Sharma, 5B

ACHIEVEMENTS

Our heartiest congratulations to all our students who were involved in the recently completed inter-school competitions. It wasn't an easy journey for many of our students as they had to juggle with their school work and the vigorous training to prepare themselves for the competition. Their achievement is certainly commendable and as a school, we are all very proud of their efforts.
